If you don't know Cooking Fever, the name is the program: Creating delicious main dishes and desserts is now part of everyday life. In the time management game you will find yourself behind the stove. Countless hungry guests find their way to you every day. Let me show you what a talented cook is in you and let people waiting with unforgettable menus. More than 100 ingredients are available for more than 250 dishes to choose from. The ingredients of individual dishes are, of course, predetermined and must be respected, so that guests leave the store completely satisfied and return soon. Soon. If you let customers wait too long, they leave the store and won't be able to see you so soon. Return to Cooking Fever – Ultimate GuideHow Strategy To get more cooking Fever GemsCoins and gems (some people call these diamonds) are earned during the game. Coins are quite easy to purchase once you have several restaurants open, but the stones in Cooking Fever seem to come along much slower. This can be very frustrating, especially when you are still at the beginning of the game with only 2 or 3 restaurants open. The internet is full of sites that claim to have a cheat or a hack to get unlimited gems for free. Cheap fixed developers that used to exist in the game, and there are no safe hacks you can install; you should know that you could download a possible virus or malware to your device. Of course, you can buy gems directly from Google Play. That's the only real way to cheat and the only way the developers of this great game make money. But if you want to try to play without spending your own money, there are still ways to accumulate enough gems. Return to the daily game for welcome reward back; After day 7 you will receive 2 stones per day per consecutive game day. (XP = Experience points, which are displayed at the top right of the screen). Each time you advance to a higher level of experience, you will receive coins and gems. You will initially receive 2 gems and will max to 7 stones per level advance. You should try to increase your XP level at least once a day. Click here for more details on the points of experience. Play at the casino as soon as you claim your daily income from restaurants; Place \$500 bets until you get 15 gems. Thanks to Duo Km'Ça, we now know that you can win 15 stones twice a day (exactly every 12 hours apart) in the casino. You will need between 5,000 and 25,000 coins to hit 15 stones in the morning (it appears to be about 18,000 coins on average) and between 25,000 and 80,000 to hit 15 stones in the evening (average seems to be about 55,000 coins required). It is harder to win 15 stones on days when the game offers discounted prices for the purchase of gems or other special. Casino becomes available at XP level 7.If you combine this strategy, you might earn up to 39 stones per day (2 for return, 7 for advancing the XP level, and 30 from the casino – if played exactly 12 hours apart). We only play twice a day if we are very small on gems because of the large amount of coins needed to play the casino twice a day. We generally only play the casino once a day and play a restaurant until we advance our XP level, which we reach 24 per day. If you're just starting the game, have less than 15 XP and only a handful of restaurants, save yourself a lot of frustration and just focus on getting 2 gems daily for game opening and replay levels to increase XP at least twice a day. You can get almost as many stones by increasing XP (plus you get get coins), unless you have used all the coins to try to win stones in the Casino. Playing Casino is better saved for when you have plenty of coins to lose (20,000+). Edit Comments Share Free Gem Glitch was an error allowing players to get free gems. It worked on all platforms. However, after an update, this error was patched. Disclaimer: If you try this glitch today your day 7+ (900 gold 2 stones) the reward will be reset to day 1 (400 gold 0 stones) and it will take up to 7 days of real life to return to the place where you were. Use old glitches at your own risk, we assume no responsibility for the potential loss of up to 12-14 gems (than what you would normally get by logging in every day, normally without cheating.) Instructions kept only for historical and entertainment purposes: disconnect the device from the internet. Enter the game and exit. Turn off all automatic time and date settings Change the date by 1 day Enter the game and you will receive a reward for logging in two days in a row. Complete this until you reach 900 coins, 2 reward stones. Continue advancing one day until you have as many stones as you want. If you just want gems, and do not want or need coins, there is a different method. Follow steps 1 to 3 above Instead of advancing time by one day, change it by one month. Start the game, and you will get 5 stones. Repeat until you have as many stones as you want. Community content is available under CC-BY-SA, unless otherwise stated.
